Notebook keeping—will it help the foreman?	438	Privilege the good worker	145	Supervision found wanting	143
Operating suggestions—how much should be paid for them?	492	Steel ties for long life	329	Nichols, F. O. Efficiency vs. sympathy	145
Payroll overdrafts—how to control	26	Hamilton, J. L. Few jobs can be standardized	331	Even the smaller mines require a safety inspector	29
Safety bonus to foremen—how should it be paid?	328	Hill, McDonald. Segregation of wet material, proper piling, cut dump fires	259	First ascertain responsibility	95
Shifting jobs—when is it advisable?	94	Hinchee, Paul W. Certain objections to the plan	597	Prefers steel ties	329
Steel ties—what economies do they yield?	258	Hornsby, Walter. His company follows the plan	597	Preparation before performance	261
Ventilation control—scientific vs. rule-of-thumb methods	374	How Mac gets that way	29	Noone, W. H. Inefficiency and low cost point to low wage standards	195
Yardage payment—would the tonnage basis be better?	546	How to draw out ideas from the men under you	548	Doctor should be within call of mine at all times	640
BEAVERS, G. K. Teach miners from bottom up	330	If they are not specialists just what are your bosses?	196	Monetary recompense for ideas stimulates real thinking	547
Bennett, Alexander. Coal mine ventilation—scientific and otherwise	439	No time for books on the job	493	Why blame tonnage or yardage?	596
Confidence in the physician is important element	641	Remove coal before dumping	260	ONIONES, JOHN N. How Indiana is handling its problems in mine safety	377
Credit to worthy employees is a profitable investment	96	Why didn't Jim investigate?	145	PIARD, M. Advises how to avoid trouble in the recovery of pillars	28
Engineering solves the problem	259	Howes, Harry T. Big men assert authority: weak men have it defined	96	Pioch, W. F. Safety inspector's reports influence caution in mine	97
In setting standardization, commence with the foreman	197	J. D. R. New plan is equitable but will labor accept it?	597	Pugh, Arthur J. Ton rate has possibilities	596
Job for day labor	597	James, Thomas. Credit preferences blamed for many labor difficulties	95	First aid at working face	641
Mac made a big mistake	144	Make up lost time by turns	143	REICK, M. E. Do not merely advocate safety; teach it at every opportunity	27
Notes save steps	493	Properly handled, the idea box ties bosses and men together	547	Reynolds, Jas. T. Look for unsafe practices and you will find them	146
Oswald is now general manager	547	Whether Mac is right must depend on circumstances	28	Mac made no mistake	144
Steel ties effect economies in thick-vein coal mines	329	Jones, Samuel A. Beware of favoritism	144	Rives, Robert. Is mine operation a side line?	95
Why use the term bonus—is not "gravy" a better word?	375	LA FOLLETTE, FRANK. Flood it!	260	It is indispensable	493
Bohn, John. Foreman is too busy	97	Leave it to Mac's judgment	197	Ross, P. B. If you must pay a bonus give it to the workers	377
In the light of experience	145	Lewis, T. J. Give the assistant a chance. Jim's plan is better than Dad's; promotion is best incentive	331	John didn't earn his pay	143
Bullock, Ostel. Mac alone was responsible	145	Long, Donald D. Employment of inspectors admits faulty supervision	439	Ruffini, A. J. Jim's system works, all right	196
Burgess, W. M. Answer to high costs	260	Long, Howard. Negligence on the job	30	SAMSON, ROBERT. To keep men satisfied	143
Foreman gets an assistant	97	Loscalzo, David A. Perhaps the safety inspector is the management's man	97	Schultz, Robert. Larger scale maps help in posting of extraction progress	27
Burget, Charles. Spending before earning should be discouraged	95	Lukens, John P. Method of slate payment where thickness is uniform	597	Stank, Frank. Average foreman is picked for all round knowledge	260
Bush, Lloyd. Notebook is invaluable to the busy mine foreman	597	Luxton, W. H. Apply bonus to production; not to safety performance	440	Severely injured should be rushed to the hospital	641
Plant location decides	642	A. B. C. of yardage	642	Stith, Van B. That the store may thrive	95
Buss, W. E. Analysis of accident costs shows need for inspectors	28	Intelligent first-aid talks	641	VOIGHT, A. L. Inspector must know and know that he knows	30
Automaticity and continuity can at least be approached	195	Slovenly workmanship demands doing job over again and again	330	WALLACE, J. W. Discipline, and not a bonus, will best promote safety	439
CASTELLANI, FENO. Superintendent is boss	29	Square dealing is rewarded	145	Warner, W. E. Bonus principle is right but its application is wrong	439
Supervision means efficiency	261	To pay or not to pay	96	Britain utilizes steel ties on main haulways only	329
This public utility company encourages safety differently	376	Vote for the old method	598	Casual inspections are best	29
Chirc, John C. Anthracite has eliminated the evils of overdrafting	96	Lyke, W. J. Here is another scheme	97	Who should be penalized?	197
Conciliation board ruled	144	M. B. C. Workers, not the bosses, should be paid safety bonuses	375	Wiley, Charles H. Money awarded as bonuses could be put to better use	377
Inspectors are indispensable	30	McDonald, George. Be prepared for emergencies	641	Notebook a living thing	493
Connaway, M. B. Let a board make decisions on the value of suggestions	548	Means, Charles M. Better to send John home and pay him for the day	146	Time studies and cost control	196
Always keep detention room free from medical reminders	640	Metcalf, G. R. Always tell the foreman what you tell the super	97	Williams, A. Official and his notebook	493
Conrad, P. G. Abolish the overdraft	197				
Crawford, J. C. You are slipping, Mac	197				
DAUGHERTY, G. E. As a business proposition	143				
Mac should not mince words; his record speaks for him	96				
Notebooks made a big man	494				
Time has proved this plan	261				
EMERSON, GRADY H. How a mine electrical man makes his notebook valuable	548
